EDUCATION

Dec 2011 Stanford's University [Human-Computer Interaction](#) online course.

Fall 2010 Vadym Hetman Kyiv National Economic University (KNEU), Credit-economic faculty (Bachelor Degree).

EXPERIENCE

Waymate **Web and Mobile UI designer**

09.2012 - Present At Waymate, as a part of UX/UI team, I'm designing multi-modal travel platform. I'm heavily involved in product development, creating design interactions, prototyping, wireframing and implementing graphic solutions for both Web and Mobile apps. On the day of our launch Waymate iOS app was downloaded over 7K times and later was featured by Apple as new and noteworthy.

Vicman Ukraine	UI designer
07.2011 - 09.2012	I was hired as a part of User Interface design team in order to implement graphic solutions and interface design, wireframing, prototyping and assisting dev and test teams on my daily basis.
BC Favorit	Web designer
10.2008 - 06.2011	I was creating web design and HTML/CSS code for internal projects.
Gvardiya Post	Compositing and video designer
08.2007 - 05.2008	I got my first serious experience as a designer in post-production company, doing 2D video effects, commercial editing, tracking and video retouching for such clients as Suzuki, Samsung, Nemiroff, Nokia, VAB, Utel, Gortchitsa and others.
PROFICIENCY	
Skills	Web is where I feel myself like home. I'm comfortable doing both complex data-intense UX and no brainer landing pages. When a project gets too complex to sketch it out, I move over to wireframes to create clear information structure. I love spending time doing digital paintings for work and for fun.
Personal qualities	I'm an easy-going person. Usually coworkers tell me I'm pleasure to work with. In my spare time I love playing tennis, learning languages, snuggling my cat and watching pug videos.
